PROFESSIONAL SUMMARY

Frontend Engineer with 3 years' experience building secure fintech, payroll and marketplace interfaces in React, Next.js and TypeScript. Accounting-trained (HND), turning financial workflows such as reconciliation and fraud review into clear, fast interfaces. At Axiom Vault, built fraud-detection dashboards for banks and SMEs and cut page load times by about 200ms. Uses AI-assisted development (Claude Code) to ship faster while keeping code clean and maintainable.

CORE COMPETENCIES

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **State & Data:** Redux, TanStack Query, RESTful API integration
- **Performance:** Code splitting, lazy loading, asset and image optimisation, performance profiling, SEO
- **Security & Fintech:** Secure API integration, token rotation, network request security, verification and fraud-review workflows
- **Tooling:** Vite, Bun, Git/GitHub, Figma (design-to-code), PostHog Analytics
- **AI-Assisted Development:** Claude Code
- **Ways of Working:** Agile/Scrum, peer code review, technical documentation, cross-functional collaboration

WORK EXPERIENCE

Frontend Engineer (Freelance) — MPF Studios 91

Mar 2026 – Jul 2026

mpfstudios91.com

- Designed and built the company website in React, TypeScript and Tailwind CSS, fully responsive across desktop, tablet and mobile.
- Improved search visibility with semantic HTML, metadata and image optimisation, increasing organic traffic by 3% within 3 weeks.
- Built landing pages with targeted call-to-action sections that increased monthly inquiries by 20%.
- Reduced load times through code splitting, lazy loading and responsive images.

Frontend Engineer — Axiom Vault

Jan 2025 – Feb 2026

Payroll fraud-detection platform for banks and SMEs | Remote

- Collaborated with the core engineering team to build a secure payroll fraud-detection platform, maintaining high standards for the security of sensitive payroll data.
- Developed responsive, reusable interfaces with React, Redux, TanStack Query, TypeScript and Tailwind CSS, improving maintainability and consistency across the application.
- Built interactive dashboards that let administrators monitor payroll records, detect anomalies and review fraud alerts in real time.
- Integrated RESTful APIs for secure payroll processing, employee management, fraud analysis and reporting workflows.
- Streamlined build configuration and package execution with Vite and Bun, reducing development reload times by 25%.
- Used performance profiling and optimisation on data-intensive payroll views, reducing page load times by about 200ms.
- Optimised state management and API interactions to eliminate unnecessary network requests, improving application performance by 20%.

Frontend Engineer (Contract) — Ogalandlord Technologies Feb 2024 – Dec 2024

Real-estate platform | Remote

- Developed scalable, reusable frontend components in React, TypeScript and Tailwind CSS, establishing a maintainable application architecture.
- Integrated secure REST APIs for property listings, tenant profiles, agent accounts and messaging, with reliable data synchronisation.
- Implemented agent verification workflows and trust indicators that protected tenants from fraudulent listings and impersonation.
- Built responsive interfaces that streamlined property discovery and simplified browsing, searching and engaging with listings across devices.
- Improved Core Web Vitals by about 30% through code splitting, lazy loading and asset optimisation.
- Maintained code quality through reusable component design, consistent coding practices and peer code reviews.

Junior Frontend Developer (Intern) — YamlTech May 2022 – Dec 2022

yamltech.com | Remote

- Collaborated with product managers and backend engineers to connect application interfaces to backend services.
- Translated high-fidelity UI/UX designs into clean, reusable React components using Tailwind CSS and Bootstrap.
- Ensured cross-browser compatibility and optimised rendering for smooth experiences across devices.

KEY PROJECTS

YamlFoods — Grocery E-Commerce Platform

yamlfoods.ng

- Built a grocery shopping experience with dynamic search, localised multi-attribute filtering and synchronised client-side cart management.
- Developed reusable layout components and optimised async state transitions to handle high-volume user activity smoothly.

Valcertra — Verified African Products Marketplace

valcertra.com | React, TypeScript, Tailwind CSS

- Built the product listing and product detail pages, including reusable product card and filter components.
- Built the checkout page and verification flows that guide buyers through a secure purchase of verified products.

EDUCATION & CERTIFICATION

Higher National Diploma (HND) & National Diploma (ND) in Accountancy Graduated Oct 2025

The Polytechnic Ibadan

Advanced React & JavaScript Programme May 2025 – Aug 2025

TechCrush
