PROFESSIONAL SUMMARY

Frontend Engineer with 3 years' experience building secure fintech, payroll and marketplace products in React, Next.js and TypeScript. An HND in Accountancy lets me turn financial workflows such as reconciliation, payment approvals and fraud review into interfaces that finance teams can trust. At Axiom Vault, I built real-time fraud-detection dashboards for banks and SMEs and cut page load times by about 200ms. I am currently designing and building SaveCircle, a collections and payout platform for Nigerian savings groups and cooperatives. I use AI-assisted development (Claude Code) to ship faster while keeping code clean and maintainable.

CORE COMPETENCIES

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
- **State & Data:** Redux, TanStack Query, RESTful API integration
- **Performance & SEO:** Code splitting, lazy loading, asset and image optimisation, performance profiling, Core Web Vitals, technical SEO
- **Fintech & Security:** Secure API integration, token rotation, network request security, payment and withdrawal approval flows, reconciliation, verification and fraud-review workflows
- **Product & Design:** Product design, Figma (design-to-code), responsive and mobile-first UI, reusable component systems
- **Tooling:** Vite, Bun, Git/GitHub, PostHog Analytics, Claude Code (AI-assisted development)
- **Ways of Working:** Agile/Scrum, peer code review, technical documentation, cross-functional collaboration

WORK EXPERIENCE

Frontend Engineer (Freelance) — MPF Studios 91 Mar 2026 – Jul 2026
mpfstudios91.com

- Designed and built the company website in React, TypeScript and Tailwind CSS, fully responsive across desktop, tablet and mobile.
- Built landing pages with targeted call-to-action sections that increased monthly inquiries by 20%.
- Improved search visibility with semantic HTML, structured metadata and image optimisation, growing organic traffic within 3 weeks of launch.
- Reduced load times through code splitting, lazy loading and responsive images.

Frontend Engineer — Axiom Vault Jan 2025 – Feb 2026
Payroll fraud-detection platform for banks and SMEs | Remote

- Built interactive dashboards that let administrators monitor payroll records, detect anomalies and review fraud alerts in real time.
- Developed responsive, reusable interfaces with React, Redux, TanStack Query, TypeScript and Tailwind CSS, improving consistency and maintainability across the application.
- Integrated RESTful APIs for secure payroll processing, employee management, fraud analysis and reporting, maintaining strict standards for sensitive payroll data.
- Profiled and optimised data-intensive payroll views, reducing page load times by about 200ms.
- Optimised state management and API interactions to eliminate redundant network requests, improving application performance by 20%.
- Streamlined build configuration and package execution with Vite and Bun, reducing development reload times by 25%.

Frontend Engineer (Contract) — Ogalandlord Technologies Feb 2024 – Dec 2024
Real-estate platform | Remote

- Implemented agent verification workflows and trust indicators that protected tenants from fraudulent listings and impersonation.
- Improved Core Web Vitals by about 30% through code splitting, lazy loading and asset optimisation.
- Developed scalable, reusable components in React, TypeScript and Tailwind CSS, establishing a maintainable frontend architecture.
- Integrated secure REST APIs for property listings, tenant profiles, agent accounts and messaging, with reliable data synchronisation.

- Built responsive interfaces that simplified browsing, searching and engaging with listings across devices.
- Maintained code quality through reusable component design, consistent coding standards and peer code reviews.

Junior Frontend Developer (Intern) — YamlTech May 2022 – Dec 2022
yamltech.com | Remote

- Translated high-fidelity UI/UX designs into clean, reusable React components using Tailwind CSS and Bootstrap.
- Collaborated with product managers and backend engineers to connect application interfaces to backend services.
- Ensured cross-browser compatibility and optimised rendering for smooth experiences across devices.

KEY PROJECTS

SaveCircle — Collections & Payout Platform for Savings Groups 2026 – Present
In progress | React, TypeScript, Next.js, Tailwind CSS, Framer Motion

- Designed the product end to end and built the frontend MVP of a collections and payout platform for Nigerian savings groups and cooperatives.
- Built organisation onboarding, the admin dashboard, group management and payment tracking, plus member withdrawals with approval workflows.
- Built reconciliation and billing modules, applying accounting knowledge to make contributions, payouts and balances easy to verify.
- Built an SEO-optimised Next.js landing page with Framer Motion animations.

Valcertra — Verified African Products Marketplace
valcertra.com | React, TypeScript, Tailwind CSS

- Built the product listing and product detail pages, including reusable product card and filter components.
- Built the checkout page and verification flows that guide buyers through a secure purchase of verified products.

YamlFoods — Grocery E-Commerce Platform
yamlfoods.ng

- Built a grocery shopping experience with dynamic search, localised multi-attribute filtering and synchronised client-side cart management.
- Developed reusable layout components and optimised async state transitions to keep the app smooth under high user activity.

EDUCATION & CERTIFICATION

Higher National Diploma (HND) & National Diploma (ND) in Accountancy Graduated Oct 2025
The Polytechnic Ibadan

Advanced React & JavaScript Programme May 2025 – Aug 2025
TechCrush
